

VTX-1300 UltraFlow Installation Instructions

Thank you for purchasing an UltraFlow air cleaner for your VTX-1300.

Please follow these steps to install your new air filter.

1. Remove the stock airbox. You will need to lift the gas tank to create enough clearance to slide the airbox out.
2. There are two hoses (emission control and crankcase breather) that are located under the carb, you need to shorten these hoses and re-route them over the top of the carb. The hoses have bends in them, the best place to cut the hose is just before the last bend:

3. Make sure the hoses can connect with the brass fittings on the UltraFlow backing plate and that the hoses are not kinked or interfering with the throttle cable when the backing plate is in position.
4. Make sure the O-ring is present on the Carb flange and use the included screws to attach the backing plate to the Carb.

IMPORTANT: Please make sure the 3 screws that hold the backing plate onto the carb are properly tightened and please use lock-tight on these screws. You *do not* want the screws to come loose and get sucked into the engine!

Happy riding, hope to see you on the road someday.
