Turn Signal Bar Installation Instructions

Thank you for purchasing a Turn Signal Bar for your VTX. This kit mounts under the lower triple tree where the headlight is attached.

Please follow these instructions to install the kit:

1. Remove the two bolts/nuts that attach the headlight support bracket to the lower triple tree and replace with the long polished bolts included in the kit.
2. Underneath the triple tree, slide the spacers over the long bolts and then thread the long bolts into the mounting bracket. The center hole on the mounting bracket is offset slightly:

3. Tighten the long bolts to secure the headlight.
4. Use the short bolt to attach the turn signal bar to the center hole in the mounting bracket.
5. Adjust the turn signal bar to be flush with the front of the lower triple tree and tighten the short bolt.
6. Route the wires into the headlight shell and connect with the VTX wiring harness. These are single filament lights so if you want them to operate as both running and turn you need to use a set of our "Magic Adapter Cables".

Happy riding, hope to see you on the road someday.
